

CUONG VU

FULL STACK DEVELOPER

Vantaa, Finland

Cuong is an up-and-coming Full Stack Developer who has proven his abilities in action. Cuong has already worked in an e-commerce company as well as building websites for customers. In addition to his skill set in web development, Cuong is a recent graduate with a B.B.A. degree in International Business. He has pursuits in marketing, leadership, and social entrepreneurship. This rare blend of backgrounds enables Cuong to understand the business objectives and use cases behind his work as a developer.

RECENT PROJECTS

GitHub User Finder

React.js, Auth0, Fusion Charts, Context API.

This project allows users to search any GitHub user profile at ease. This website includes authentication which powered by auth0. The api is provided by <https://api.github.com>.

E-Commerce Store

React.js, Auth0, Stripe, Context API, Netlify CLI.

Ecommerce website which utilizes Stripe for payment, and Auth0 for authentication. The main skeleton of state management is backed by Context API.

Job Search Application

React.js, JWT, MongoDB, Context API, Heroku, Node.js, Express.js.

Job search website with authentication and analysis dashboard. Users have the ability to filter searches to find jobs relevant to them.

Blog Application

React.js, JWT, MongoDB, Context API, Heroku, Node.js, Express.js.

Blog website with user authentication, and the ability to add blog posts.

Chat Application

React.js, ChatEngine.

A Simple Chat app that was constructed using ChatEngine.io.
